

Stacking Plate Instructions

- 1) ***Ensure your cabinetry will support the stacked Blue Star wall ovens, approximate weights:***
 - stacked 24" 525 lbs*
 - stacked 30" 625 lbs*
 - stacked 36" 725 lbs*
- 2) Remove (6) sheet metal screws from (3)left and (3)right side of top cover of lower oven.
- 3) Proper alignment is achieved when the upper and lower oven front frames are vertically flush. Measure the (upper oven) distance from the front frame edge (A) to the end of the oven base (B), Place stacking plate on top of lower oven, adjust the stacking plate to match the A – B measurement from lower oven front frame edge to the inside of the stacking plate rear lip and reinstall screws removed in step 2.
- 4) Place Upper oven on top of stacking plate.
- 5) Install (4) sheet metal screws through the back of stacking plate into base of upper oven.
- 6) Note: Stacking procedure is identical for 24", 30" and 36" stacked units.
- 7) Proceed to preparing gas connections.
